14. Beyond Purdah by Mark Tully

Suraiya was not a woman who liked to think that anyone had got the better of her, especially not domestic servants. The cooks who arrived in the household each year to prepare the evening meals during these ten days of *Moharram* always upset her. She knew they were cheats and that there was nothing she could do about it because the elder women of the family always defended them. But that didn't stop her dipping a ladle into the yellow-brown kichara- a gruel of several different types of grain and meat-bubbling vigorously in a smoke-blackened pot. She lifted the ladle and poured the liquid back slowly, leaving one small piece of meat in the bottom tasting it she asked sharply, "what sort of meat is this? It's still tough after cooking for five hours the butcher must have given this goat away as it must have been born when my grandfather was young"

15. "Just lather, that's all" : Hernando Tellez

He said nothing when he entered. I was passing the best of my razors back and forth on a strop. When I recognized him I started to tremble. But he didn't notice. Hoping to conceal my emotion, I continued sharpening the razor. I tested it on the meat of my thumb, and then held it up to the light. At that moment he took off the bullet-studded belt that his gun holster dangled from. He hung it up on a wall hook and placed his military cap over it. Then he turned to me, loosening the knot of his tie, and said, "It's hot as hell. Give me a shave." He sat in the chair.

I estimated he had a four-day beard. The four days taken up by the latest expedition in search of our troops. His face seemed reddened, burned by the sun. Carefully, I began to prepare the soap. I cut off a few slices, dropped them into the cup, mixed in a bit of warm water, and began to stir with the brush. Immediately the foam began to rise. "The other boys in the group should have this much beard, too." I continued stirring the lather.

"But we did all right, you know. We got the main ones. We brought back some dead, and we've got some others still alive. But pretty soon they'll all be dead."

"How many did you catch?" I asked.

"Fourteen. We had to go pretty deep into the woods to find them. But we'll get even. Not one of them comes out of this alive, not one."

In India British came for business and whatever they did they did for money, and all this changed the whole political system of India. Not only this, Indian freedom movement got the strength when common man that is farmers and artisans joined the movement when they realized their condition became miserable because of British policies. Gadhiji's first organized campaign in India was in Champaran for the economic rights of the peasants of Champaran. So it is very clear that economics and politics are closely related.
